

L 2186 L

2.1 RM

POSITIONING & MANAGEMENT

This exciting Liberty soybean carries the C-gene for Phytophthora, SCN resistance from PI 88788 and excellent scores for White Mold, Sudden Death Syndrome and Charcoal Rot. It also has very good ratings for Brown Stem Rot and Iron Chlorosis. It is a little taller than L2083L making it a better fit for fields with variable soils and topography. Yields will rival L2258L and L2358L

TOP QUALITIES

- Strong emergence and vigor
- SCN resistance from PI 88788
- C-gene for Phytophthora
- Excellent SDS tolerance
- Pairs well with L2083L & L2358L
