

LH 5965 VT2 PRO RIB**109 RM****POSITIONING & MANAGEMENT**

This medium-tall hybrid with semi-flex ears brings strong yield potential across a wide range of environments. It moves north or south out of zone and can handle a wide range of planting populations due to that ear flex. This is an excellent hybrid under irrigation but can also handle some variable or tougher soils. It carries very good tolerance to Goss's Wilt, Eye Spot and both Northern and Southern Leaf Blights.

VT Double PRO[®]
RIB COMPLETE[®]

HYBRID ADVANTAGES

- Terrific yields across all environments
- Moves north and south out of zone
- Very good Goss's Wilt score
- Good ear flex for variable planting populations

DISEASE RATINGS

Gray Leaf Spot	3.0	Southern Leaf Blight	2.0
Eye Spot	2.0	Common Rust	2.5
Anthracnose Stalk Rot	3.0	Goss's Wilt	2.0
Northern Leaf Blight	2.0		

OVERALL CHARACTERISTICS

Corn on Corn	2.5	Emergence	2.5
Suggested Population	28-36	Flowering For Maturity	L
Herbicide Sensitivity	None	Cob Color	Red
Foliar Fungicide	R	Husk Cover	Medium
Drought Tolerance	2.0	Shank Length	Medium
Test Weight	2.5	Number of Kernel Rows	16-18
Drydown	2.5	Ear Type	SF
Stay Green	3.0	Silage Rating	2
Root Strength	2.5	Leaf Angle	Upright
Stalk Strength	3.0	Ear Height	M
Early Vigor	2.5	Plant Height	MT

1: All Rating Scales are 1 to 5; (1 = Excellent, 5 = Poor, 0 = No Score)

2: Herbicide Sensitivity: PI = Pigment Inhibitors, Pre PI = Pigment Inhibitors applied Pre-Emergence, SU = Sulfonylureas, GR = Growth Regulators
