

LH 6187 VT2 PRO DG RIB

111 RM

## POSITIONING & MANAGEMENT

LR 6187 is a limited release hybrid that is widely adapted across all of Latham Country. It produces big, girthy ears with very thick and very deep kernels. Optimal performance will be at higher populations with attention to top-end management. It is rated very good against Goss's Wilt and Northern Leaf Blight and responds very well to a foliar fungicide application. Roots and stalks are very good. If an insecticide is used for rootworm control, this hybrid has the guts to handle tough corn-on-corn situations.

### HYBRID ADVANTAGES

- Limited release DroughtGard for 2018
- Extremely deep kernels on a girthy ear
- Wide range of adaptability
- Foliar fungicide recommended for top-end yields

### DISEASE RATINGS

<b>Gray Leaf Spot</b>	3.0	<b>Southern Leaf Blight</b>	2.5
<b>Eye Spot</b>	2.5	<b>Common Rust</b>	3.0
<b>Anthracnose Stalk Rot</b>	2.5	<b>Goss's Wilt</b>	2.0
<b>Northern Leaf Blight</b>	2.0		

### OVERALL CHARACTERISTICS

<b>Corn on Corn</b>	2.0	<b>Emergence</b>	2.5
<b>Suggested Population</b>	32-38	<b>Flowering For Maturity</b>	ML
<b>Herbicide Sensitivity</b>	None	<b>Cob Color</b>	Red
<b>Foliar Fungicide</b>	HR	<b>Husk Cover</b>	Medium Long
<b>Drought Tolerance</b>	1.5	<b>Shank Length</b>	Medium
<b>Test Weight</b>	3.0	<b>Number of Kernel Rows</b>	16-18
<b>Drydown</b>	2.0	<b>Ear Type</b>	M
<b>Stay Green</b>	3.5	<b>Silage Rating</b>	2.5
<b>Root Strength</b>	2.0	<b>Leaf Angle</b>	Upright
<b>Stalk Strength</b>	2.0	<b>Ear Height</b>	M
<b>Early Vigor</b>	2.5	<b>Plant Height</b>	M

1: All Rating Scales are 1 to 5; (1 = Excellent, 5 = Poor, 0 = No Score)

2: Herbicide Sensitivity: PI = Pigment Inhibitors, Pre PI = Pigment Inhibitors applied Pre-Emergence, SU = Sulfonyleureas, GR = Growth Regulators
